**MINISTRY OF COMMERCE AND INDUSTRY****RESOLUTION****TARIFFS***New Delhi, the 4th June 1955*

**No. 37(1)-T.B./54.**—The Tariff Commission has submitted its Report on the continuance of protection to the Calcium Chloride Industry on the basis of an inquiry conducted by it under Sections 11(e) and 13 of the Tariff Commission Act, 1951. On the main question before it, the Commission has found that the fair ex-works price of indigenous calcium chloride is less than the landed cost, without duty, of imported calcium chloride. The industry has enjoyed protection for eight years and has during this period proved its capacity to meet the full requirements of the country. The Commission has therefore come to the conclusion that there is no case for further continuance of protection to the industry and has recommended that protection should not be continued beyond 31st December, 1955. Government accept this recommendation and steps will be taken to implement it.

2. The Commission has made the following ancillary recommendations:—

- The Indian Standards Institution should formulate standard specifications for the indigenous calcium chloride in consultation with the industry as early as possible.
- Government should consider favourably the requests made by the industry to develop an export market in foreign countries.

Government accept these recommendations and suitable steps will be taken to implement them as far as possible.

3. The following suggestions have also been made by the Commission:—

- Government should investigate the possibility of manufacture of potassium chloride at the two soda ash plants in the country at a reasonable cost.
- In some of the ice factories and cold storage and refrigeration units in the country, there is a growing tendency to use common salt in place of calcium chloride. Apart from the corrosive effect of salt on refrigeration plant, the use of common salt would entail more expenditure in the long run owing to greater consumption of electric power. This aspect should be examined carefully by persons in-charge of ice factories and cold storage and refrigeration units before adopting or continuing the use of common salt in place of calcium chloride.

Government have taken note of suggestion (i) above for further action in consultation with the soda ash manufacturers. The attention of persons in-charge of ice factories and cold storage and refrigeration units is invited to suggestion (ii) above.
